PROJECTS

TECHstile (ERP)

Manage day-to-day business activities such as accounting, supply chain operations.

- Using **Reactive Forms** to create informative forms for the transitions.
- Developed and designed a **mobile view** for **20** screens. Which allows the user to check or approve the order status .
- Making complex challans and invoices using **bootstrap** for responsiveness.

Patient-Outreach II Inconnect

Reach out to the Patients through Campaigns and Programs through **4** different types of channels: **SMS, Email, Voice, and Letter**.

- Helping **80%** of the Patients by sending a reminder about the checkup.
- Accomplished **Phone number validation** and **Email Id validation and the fix** will save almost **1/4** the cost of a Campaign.
- Revamped the dashboard to **filter** out patients based on engagement.
- Implemented a flow before activation to avoid sending programs before **mandatory checks**.
- Allowing the user to **prioritize** certain **programs**.
- **Migrated 4** micro-services basic components(like Buttons, Spinners, Text, etc.) to **MDS(Innovaccor Masala Design System)** which is built on **Material UI**.
- Contributed to the company's Design System **library**.

-
- Optimized **API** calls using debouncing with **400ms** delay in all paginations which improves the performance of the product.
 - Enhanced the **6** different statuses of Campaigns with percentages and a **Progress bar**.
 - Provided **Logs** for Sender details and added **Dropdown** and **sorting** to filter out logs based on 4 different Channels.
 - Implemented autoDismiss **Toast** which will dismiss after **8** secs.

InRecord

Developed a web application where doctors can store and maintain their **Patient Health Records**.

- Creating a Docker file and Pushing the Image to **Docker Hub**.
- Automated all test suites with **Selenium** with Python.
